

OVERHEAD PATCH RACK

The overhead patch rack is available with 4 rack units and is the most ideal solution providing additional rack units above racks and cabinets to fully utilize the valuable spaces in data centers.

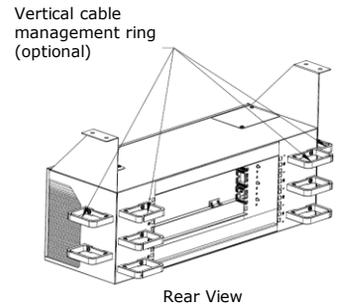

With well designed air flow control components and cable management rings, it provides a safe, flexible and space saving housing for all 19" EIA compatible patch panels of both fiber and copper.

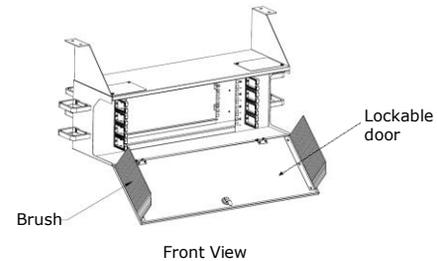

KEY FEATURES:

- Available with 4 rack units and compatible to all 19" EIA standard patch panels
- Can be easily mounted on cable ladder with the mounting brackets
- Option of pre-assembled vertical cable management rings
- Vertical mounting rails with numbered RU marks
- Lockable door to restrict unauthorized access
- Side cable entrances equipped with brushes
